

## A Second Letter from Michelle

Good Day,

My name is Michelle Cevallos, representing all of the patients that were operated on. I am writing this with the utmost gratefulness for all the doctors in the brigade.

I feel very lucky for having been born with a malformation of my ear because it has helped me to become a very strong girl and I got to meet the doctors in the brigade who love us and have a lot of patience with us. They are just so lovely! They are awesome!

Every single day I ask God to watch over them and give them a very long life so they can continue to give the gift of ears to those of us who need them.

Each year I see my different ear become more beautiful, but I also see around me my friends, parents, families and awesome Dr. Jarrin and I feel very happy. I hope I can say we are a great big family, the family of little ears.

Thousands of thanks to the medical brigade and I hope you don't forget that in Ecuador when you come, you come to family.

We love you very much...

Have a good trip and we will be waiting for you next year.

Michelle
